Evidence to Impact Speaker Series

March 6th, 2019 | 12:00pm-1:00pm, Lunch Provided | 040 Trent Hall

Balancing Program and Research Interests: Insights from Evaluation Studies in Ghana, Kenya, and Cameroon

This seminar will discuss Academic-NGO partnerships to facilitate evidence-based programming and the challenges of implementing cluster randomized trials.

John Hembling, MPH, is the Senior Technical Advisor for Health Evaluation and Research at Catholic Relief Services. He supports the agency’s global health and social services team to implement rigorous program monitoring, evaluation, accountability and learning. Currently, John is responsible for multiple studies on CRS’ vulnerable children programming, including early childhood development, microfinance and family strengthening.

John Gallis, ScM, is a biostatistician in DGHI’s Research Design and Analysis Core and supports the Evidence Lab’s CRS Evaluations in Cameroon, Ghana, and Kenya. Gallis recently published cvrand and cptest: Commands for efficient design and analysis of cluster randomized trials using constrained randomization and permutation tests in the Stata journal based on his work on the CRS Cameroon Evaluation.
