

UNDERGRADUATE GLOBAL HEALTH

find your path
to global health

inspire. connect. transform.

Duke is the leader in global health education

Duke University offers the most comprehensive portfolio of global health education programs of any US university.

Whether you want to pursue a rigorous global health **major**, supplement your coursework with the **minor**, or immerse yourself in a global health **experiential learning activity**, the global health world is at your fingertips.

MAJOR

Combine the global health major with any other major at Duke to create your one-of-a-kind education experience. An A.B. in global health requires a co-major and 10 courses, 1 statistics co-requisite, and an experiential learning activity. Talk to an advisor today to find out how you can create your path in global health.

MINOR

Offering greater flexibility than the major, the minor is an ideal solution for students who are curious about global health and want to supplement their primary study focus. It requires two courses and three electives.

INSPIRE

**find your passion,
direction and focus**

Join our thriving intellectual community and take advantage of the following resources and opportunities:

- Journal Club
- DGHI Student Council
- Career Advising
- Alumni Network
- Student and Faculty Blogs
- Student Clubs
- Seminars
- Special Events

world-class faculty

DGHI's faculty are committed to teaching, mentoring and helping students find their path. They are leading experts in public policy, medicine, environment, engineering, psychiatry, anthropology and more, providing a strong multidisciplinary educational experience.

DAVID BOYD

Associate Professor of the Practice, Global Health
Instructor, Fundamentals of Global Health

CONNECT

**apply your classroom
knowledge to the world**

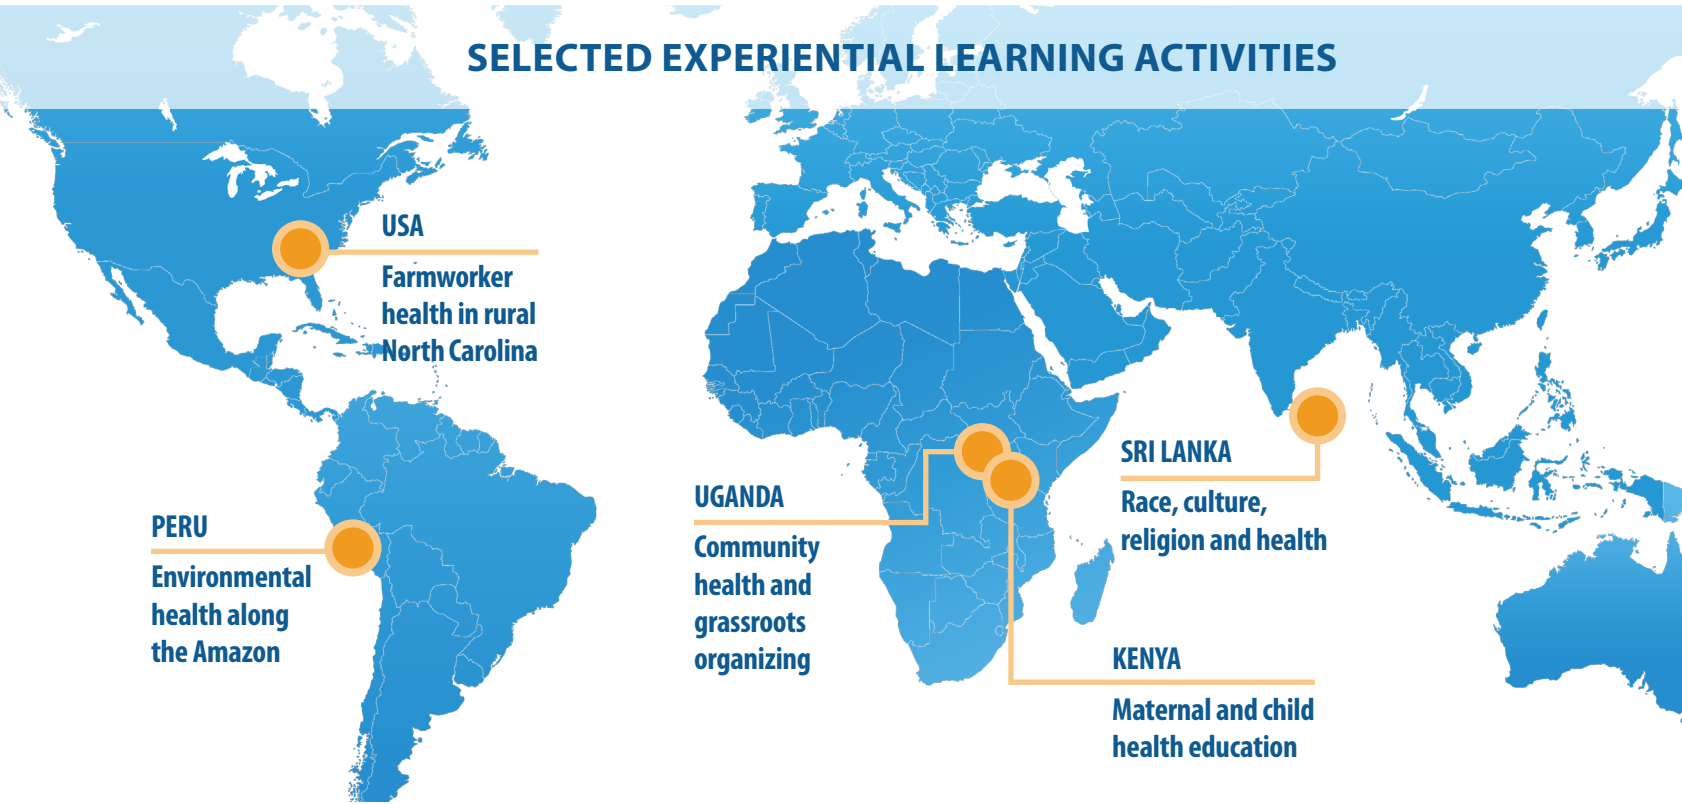

Student Research Training Program

Engage in the development, implementation and assessment of a community-based project in one of many local and international locations.

Bass Connections in Global Health

Work creatively alongside faculty and fellow students to address global health challenges worldwide.

SELECTED EXPERIENTIAL LEARNING ACTIVITIES

TRANSFORM

make your future matter

Many global health students pursue graduate or professional education in global health, medicine, law and business. Others are prepared for careers at research and policy think tanks, like non-governmental organizations, government agencies, multilateral organizations, and academic institutions.

The Duke Global Health Institute offers career advising and professional development for undergraduates through individual career advising, on-campus skill-building workshops, career fairs and access to the DGHI alumni network.
